*(Recognizing that not all attacks are reported to the CDOW)*

- 1) **December 2009**- At 3am an Englewood woman was in her yard with her two small dogs when two coyotes entered the yard. One coyote attacked and carried away one of the dogs. The remaining coyote growled at the woman from 5 feet away. It would not leave when she screamed and threw snowballs at it. She ran inside her residence. Her husband retrieved their injured dog from the other coyote (down the street from the house), and the coyote growled at the husband and did not leave immediately. One coyote was killed and disease testing returned negative.
- 2) **November 2009**- A 63 year old man was **bitten** by a coyote as he rode his bike near a busy highway interchange in Douglas County. The coyote lunged and jumped at him, biting him just above the knee and leaving two puncture wounds. Tracks in the area indicated there were three coyotes living in this area; two coyotes were subsequently killed and disease screening was negative.
- 3) **October 2009**- A woman in southeast Aurora woman was **bitten** by a coyote as she walked her leashed 25 pound terrier-poodle mix into the cul-de-sac in front of her home. The woman used her dog's leash to "reel in" the dog from approximately six feet away. While intervening in the coyote attack on her dog, she was bitten in the hands and arms by the coyote. As she ran back to her home carrying her dog, the coyote followed her, lunging and biting at the dog. The coyote was subsequently euthanized and tested negative for rabies and distemper.

The boy reported that when the coyote saw him it dropped the rodent and ran towards him. He crouched down and stated that the coyote lunged at his throat.
